

Gian Carlo S. Victorino

Bachelor of Science in Information Technology

- +63 908 989 6733
- giancarlosvictorino@gmail.com
- Quezon City, Philippines

Profile

Innovative IT professional combining full-stack development (React, Laravel, PostgreSQL) with hands-on technical infrastructure and hardware maintenance experience. Proven track record of automating manual workflows, deploying fast and secure web applications and software with analytics. Passionate about building efficient, safe, and user-centric technology solutions.

Education

Far Eastern University - Institute of Technology (July 2022 – September 2026)

- Bachelor of Science in Information Technology with specialization in Web and Mobile Applications

Experience

Commission on Elections - Hardware Technician (March 2025 – May 2025)

- Maintained critical voting infrastructure by conducting strict QA on hardware diagnostics and preventive maintenance on vote-counting machines, ensuring 100% operational readiness throughout the election period.
- Resolved complex technical hardware failures for field units, identifying root causes in peripheral components and power supplies to minimize downtime and prevent delays in data transmission.
- Successfully deployed fully functional equipment to voting precincts by meticulously testing and calibrating hardware components for over 20 + automated counting machine (ACM) precinct units, resulting in a flawless and error-free setup for the 2025 National and Local Elections in the Philippines.

Olopa Corporation - Software Developer Intern (January 2026 – March 2026)

- Constructed a full-stack company attendance monitoring system by building dynamic components in React and a backend API using Laravel, successfully automating a previously manual employee tracking process.
- Managed database architecture, API integrations, and team workflows, which included optimizing PostgreSQL relational schemas and implementing Git version control branching strategies to maintain code integrity.
- Delivered a fully automated, real-time attendance tracking solution for employees that completely eliminated manual logging errors, lessened HR payroll preparation, and provided the company with secure, instant access to employee attendance records.

Abiva Publishing House Inc. - Web Developer Intern (April 2026 – June 2026)

- Developed interactive and standards-compliant XHTML webpages from scratch, transforming static educational content into structured digital learning materials tailored for elementary resources.
- Programmed semantic web layouts using XHTML and custom CSS, while managing the formatting, packaging, and optimization of digital assets into ePub formats for cross-platform compatibility.
- Produced highly accessible, responsive, and visually appealing digital textbooks available on web that significantly enhanced the interactive e-learning experience for elementary students and educators.

Certifications

Networking and Infrastructure

- CCNA: Introduction to Networks – Cisco
- DevNet Associate – Cisco
- Linux Essentials – Cisco
- IT Specialist in Networking – Pearson

Cybersecurity and Support

- CyberOps Associate – Cisco
- CCST Cybersecurity – Cisco
- Technical Support Fundamentals – Google
- Cybersecurity Fundamentals – IBM
- Getting Started with Cybersecurity – IBM

Software Development and Data

- IT Specialist in Python – Pearson
- Python Essentials 1 – Cisco
- Web Development Fundamentals – IBM
- Data Literacy – IBM
- Data Fundamentals – IBM
- Introduction to Internet of Things – Cisco
- Introduction to AI – University of Helsinki

Project Management and IT Foundations

- PMI Project Management Ready – Project Management Institute
- IT Fundamentals – IBM
- Risk Analysis for Project Management – University of the Philippines Open University
- Introduction to Technology for Teaching and Learning – University of the Philippines Open University
